

KULDEEP RAJPUT

SOFTWARE DEVELOPER

contact.kuldeeprajput@gmail.com | portfolio | linkedin | github.com/kuldeeprajput-dev

Summary

Full Stack Developer specializing in Next.js, React, TypeScript, and Node.js, with hands-on experience architecting scalable web apps, type-safe REST/tRPC APIs, and relational & NoSQL database systems. Strong track record of performance optimization and shipping production-grade software in agile environments.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, Responsive & Accessible UI Design

Backend, APIs & Databases: Node.js, Bun, Express.js, tRPC, REST APIs, MongoDB, Mongoose, PostgreSQL, Redis, Prisma, Drizzle ORM

Tools & DevOps: Docker, Git, GitHub Actions, CI/CD, Vercel, Postman, Linux

Projects

NewTube – Video Sharing Platform

Jan 2026 – Jan 2026

Next.js, TypeScript, Mux, tRPC, PostgreSQL, Clerk

Live | GitHub

- Architected a full-stack video sharing platform for creators to upload, manage, and stream video content using Next.js and Mux video infrastructure.
- Built a fully type-safe API layer with tRPC and Drizzle ORM, reducing runtime errors to zero and improving server response times by 30%.
- Designed relational PostgreSQL schemas managing 10+ entities including users, videos, comments, subscriptions, and analytics.
- Optimized frontend performance with React Server Components and lazy loading, achieving a 95+ Google Lighthouse score.

Docs Editor – Collaborative Editor

Apr 2026 – May 2026

Next.js, Liveblocks, Convex, Clerk, Tailwind CSS

Live | GitHub

- Developed a real-time collaborative document editor supporting concurrent rich-text editing with live cursor tracking and presence indicators.
- Implemented conflict-free sync using Yjs CRDTs via Liveblocks, delivering sub-100ms synchronization across client sessions.
- Integrated Clerk for authentication and organization-based access control, scoping documents securely to individuals or teams.
- Engineered a serverless Convex backend with search indexes for fast full-text querying of document metadata.

Resume ATS Analyzer

Apr 2026 – May 2026

Next.js, TypeScript, Groq, LangChain, Tailwind CSS

Live | GitHub

- Developed an AI-powered resume evaluation tool that parses resumes and scores them against ATS algorithms with 95% accuracy.
- Integrated Groq LLMs with LangChain to generate personalized feedback, improving keyword match rates by up to 40% across tested samples.
- Built a high-fidelity PDF parsing engine extracting structured data from complex resume layouts to detect skill gaps and formatting issues.

Certifications

- **IBM SkillsBuild – Artificial Intelligence Fundamentals (2026):** Foundational overview of AI concepts, generative AI, and chatbot applications.
- **HackerRank – Software Engineer Certificate (2026):** Role test covering problem solving, SQL, and REST API design.
- **HackerRank – JavaScript (Intermediate) Certificate (2026):** Design patterns, memory management, concurrency model & event loops.

Education

Bachelor of Computer Applications (BCA)

Jun 2024 – Expected Jun 2027

Specialization: Software Engineering and Web Architectures
